January 2022

THIS MONTH —

A New Year

Happy New Year from Savas Labs!

New projects, clients, team members, Labs™ initiatives - We're beaming about what's in store for this upcoming year.

 **Featured work —**

Last year, our team had the privilege of working with the Cancer Support Community to build a learning portal for those transitioning out of cancer care. Their Cancer Transitions program is held virtually and in locations throughout the country. Critical to the project's success was making courses accessible by participants, facilitators, and location administrators with varying permissions per role. Utilizing a system of components with an emphasis on usability and accessibility, we equipped the CSC team with the tools needed to keep content up to date and organized.

[22 Inspiring Web Design Trends for 2022](#)

These 22 web design trends for 2022 will help inform and inspire what people build for the web. Dive on in.

Mischa Vaughn, Webflow

[Why Your Project Needs a Discovery Phase](#)

When we begin a project, it is crucial we invest time into understanding the problems at hand. That's why projects need a discovery phase.

Simon Goodwin, Senior UX Designer/Product Strategist

[11 Web Development Trends to Expect in 2022, According to Experts & Data](#)

These dev trends are exciting and we can't wait to try some out, but only if it's the right fit for you!

Harikrishna Kundariya, eSparkBiz

 Client shoutout —

Shoutout to one of our newest clients, the Department of Energy's Waste Isolation Pilot Plant. Based in New Mexico, WIPP is the nation's only repository for the disposal of nuclear waste known as transuranic, or TRU, waste. It consists of clothing, tools, rags, residues, debris, soil, and other items contaminated with small amounts of plutonium and other man-made radioactive elements. Disposal of transuranic waste is critical to the cleanup of Cold War nuclear production sites and this TRU is sent from around the country to WIPP for permanent disposal.

Be on the lookout for exciting updates regarding their digital presence soon!

Meet the team —

Please help us welcome one of our newest team members, Lisa Trevis!

Lisa is a Front-End Developer who comes to us from the far away creative land of California where she did everything from sales & marketing, to account management, to coding for Apple! Her breadth of experience and knowledge gained at the highest level is a welcome addition to our growing development team!

Considering making the trek to the Bay Area anytime soon? Here are a few recommendations from resident Lisa:

1. [Skip Golden Gate Park](#) (controversial!!) and head to Joaquin Miller Park in Oakland instead.
2. [Find a local food festival](#), street food pop-up, or food truck collective to get a feel for the actual community.
3. [Tour the haunted Winchester Mansion](#) in San Jose for a spooky adventure.

[Check out Lisa's portfolio →](#)

And now, a GIF —

Forward Together!

Closing thoughts —

We're continuing our hiring push for a variety of roles to support ours and our clients' growth this year. If you want a career that gives you the opportunity to grow and learn as a professional or know someone who's looking, reach out!
