

THIS MONTH —

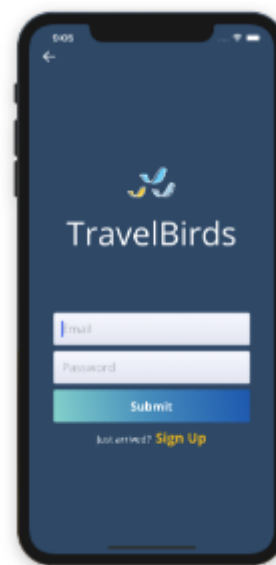

An Eye Towards the Future

As phased reopening plans roll out, we're all a bit timid on what the new normal after the new normal really looks like. As many industries adjust to this transitional time, this month we're taking a look into the future and planning for a brighter day. That day could be next week, next month, or next year but we're hopeful to envision a future of opportunities born out of the recent challenges.

Featured work —

When we daydream of getting back to normal, travel is pretty far up the list of things we're looking forward to in the future. [TravelBirds](#) helps travelers connect and plan amazing adventures together by gamifying travel planning. Check out their recently launched mobile app (that we built for them) that helps you plan your next adventure.

The more you know —

[It's Time to Build →](#)

A call to build a better future out of the current pandemic.

Marc Andreessen, Andreessen Horowitz

[Using Your Website to Communicate in Crisis Situations →](#)

Having site flexibility will be important now and moving forward.

Alex Manzo, Savas Labs

[The Robot Revolution \(Of Crop Picking\) Is Here →](#)

A robotic solution could provide a future, safer alternative.

Stephen Gossett, BuiltIn

[Content Syncing to Ease Code Reviews and Deployments →](#)

For improving your deployments and code reviews in the future.

Dan Murphy, Savas Labs

 Client shoutout —

We'd like to give a shout out to **Duke Global Health Institute**. The institute brings together knowledge and resources from across the university to address important global health issues and they've been busy covering the pandemic. Recently we partnered with their team to redesign **globalhealth.duke.edu**.

** And now, a GIF —**

All this future and travel talk has us day dreaming about a beach vacation!

😊 Meet the team —

Meet **Drew Glover**. Originally from Asheville, Drew is a racing aficionado (both virtual and real life) that enjoys all things design (especially soccer shirts). When he's not whipping up beautiful digital interfaces for us he's taking care of his big orange cat James. Wanna work with Drew?
